1 Introduction

This document replaces the Paper & Wood Procurement Policy signed in 2012 (document reference QA018). Most of the changes have to do with format, and there are no major changes.

1.1 Objective

Every year 130,000 square kilometres of forest are cut down or burned. This is equivalent to the destruction of an area the size of a football field every 1.4 seconds. The clearing of tropical forests is a big contributor to global climate change and accounts for about 20% of the world's greenhouse gas emissions. METRO Cash & Carry aims to contribute to the goal of zero net deforestation in 2020 by responsibly sourcing its timber and paper products, as these are some of the key commodities causing deforestation.

1.2 Scope and target groups

- All MCC operations and business support functions, in all countries
- All own-brand products (common and local sourcing) sold by MCC, particularly those in which wood or wood fibre accounts for more than 50 % of the finished product (in terms of weight)¹.

2 METRO Cash & Carry targets

METRO Cash & Carry aims to ensure that 100% of its own-brand products made from wood or wood fibre in accordance with the aforementioned scope originate from legal and responsibly managed forests by the end of 2020.

3 Policy framework

METRO Cash & Carry is committed to promoting sustainable forestry and continuously seeks to optimise the purchasing process in order to ensure that it only purchases wood and paper products originating from legal and more sustainable sources.

This should ensure that:

- The material is harvested in compliance with applicable legislation in force in the country of harvest (e.g. harvest rights)
- The forest has been managed in compliance with the principles of sustainable forest management, which balance social, economic and ecological needs
- Traditional and civil rights of indigenous people, local communities and workers who benefit from the forest management and production are respected and protected
- Ecosystems, biodiversity and ecological processes are maintained or restored, especially with regard to forests of high conservation value
- A proper management plan and a corresponding monitoring process are implemented and documented

¹ See list of product categories in Annex 1

For assessing compliance with the aforementioned criteria on legal and sustainable forest management practices in the supply chain, the following shall apply:

- 1) Products made from recycled wood or fibre are considered to be sustainable for the purpose of this policy; preferably they should be certified according to ISO 14024² type I label
- 2) Products made from virgin fibre have to be certified in accordance with a third-party forest certification scheme, with the following order of priority:
 - 1.1 Forest Stewardship Council (FSC) or
 - 1.2 Programme for the Endorsement of Forest Certification Schemes (PEFC) or
 - 1.3 Equivalent standard according to the available benchmark of certification schemes
- 3) Business partners must have proper in place to track and report the origin of the timber contained in the final product made from virgin fibre to verify that the timber has been harvested legally. The following traceability information is required for each wooden component of the product:
 - 3.1 Type of wood
 - 3.2 Scientific name of tree species
 - 3.3 Country of origin of wood
- 4) For all products covered by the scope of this policy, METRO Cash & Carry will require that its suppliers comply with the requirements of BSCI or another accepted standard as listed on the [webpage](#)

4 Reporting

- METRO Cash & Carry will make this policy publicly available and progress will be reported in the METRO Corporate Responsibility Report
- The progress against the target will be measured on the basis of the following key performance indicators (KPI):
 - Number of SKUs that comply with the criteria for assessing sustainable forest management practices in the supply chain
